

K.M.A. - No E.15. !!

F.C. Reason given - no O.G. left.

There is some left - that's what
they'll log out first if we can't stop it.
- ultimate fate of KMA. 12 yr. rotations.

Ph. 065-598114

David Campbell St.
NORTH HAVEN. 2443

NEFA. Delegate
Wauchope/Kendall M.A.
22/6/92.

Hi John,

(Mollie Rowell's)

Am writing to add to Mollie Rowell's
note that the Pollution licences are exactly
the same for all the management Areas here
i.e. Wauchope/Port Macquarie/Kendall.

I have obtained a logging Schedule
for the Wauchope M.A. 1991/92 as
well as that for Kendall M.A.

I am including copies of same just so
you can get some idea of the type of logging
activity that is planned. i.e. 12 yr rotations ^{for KMA}
We have been trying to look at the Compartments
involved where possible.

The old growth will be the very first on the
Schedule no doubt. Compartment on middle
Brother mountain (K.M.A.) 239 was Old Growth
on steep land (very) - not a large area but
very valuable - the bastards are ^{going} in there first
~~logging~~ because they knew it was ^{among} the last
remnants of O.G. on middle Brother SF. (mountainous ^{country})

We will keep in touch with NEFA members
I hope to get organised for action down here soon.
NPA is right behind you here John.

Best wishes

Isabel Lee

Post Script

SEE OVER

We May ^{now} get a hold on the logging on Middle Brother Mtn
owing to NPWS intervention - we found a
rare plant also slopes within ^{Classified} Catchment
Protection Area & in excess of 35°.

F.C. are up there and very keen to avoid
confrontation — will keep NEFA posted
on the outcome of the situation — head
Forester at Kendall not very friendly
but under instructions from ^{F.C.} Liaison Officer
(Poil Macquarie) Andrew Engles. who says
to refer back to him ~~if~~ ^{if} we get 'fobbed off.'

Cheers J
Osabell.
