Please could we have this information published in next weeks gig guide and any other relevant areas ie community calender.

NORTH EAST FOREST ALLIANCE (NEFA) are holding a BIG GIG "FABULOUS FUN FOR FUTURE FORESTS" on SATURDAY 8th JULY AT LISMORE CITY HALL 2pm - midnight.

NEFA are celebrating the Labor Government's steps to halt old growth logging. This is a result of continuous campaigning by NEFA over the past 7 years.

All proceeds from this benefit will enable NEFA to ensure the protection of old growth forests, rainforest, endangered species and water catchment, oversee the implementation of a comprehensive, adequate and representative reserve system of our native forests and ~~to encourage~~ to ensure ^{the development of an ecologically} sustainable forestry Industry ~~development~~.

A great day of entertainment for all ages with the Von Tramp Family Puppets, Fire dancing, The Rags - Shagui Dancers, Heatic. The line up of bands includes Hudabistic Funk, Ragadoll, Nummy Snug, R202, Grispoon, MAIL ORDER BRIDES Stump Trucks, Magic Lijf, Will Hogg and Dr. Seuss's Signature. Lots of amazing food will be ~~available~~ available. FORESTS most SURVIVE '95

Thank you Ferguson

OLD GROWNS NEW FOREST

PRICE LIST \$ Australian SAPFLOW SENSOR SYSTEMS

Model SF100 System	Model SF200 System
Compact tree mounted logger and probe system utilising the heat pulse technique to determine real time sap flow. Includes self calibration system and internal data safe feature to protect records from power loss. Standard system includes test mode with graphical output and an intelligent logger interface (SAPCOM) which permits complete user control over system parameters. The SF100 consists of a single logger with two probe sets, each with dual heat sensors. System provided with two metres of cable as standard.	Sapflow system designed for installation in trees and stems of diameter 20mm or less. The Mini Probe System consists of four miniature probe sets permitting up to four measurements on the one stem or single measurements on up to four stems. Includes the same features as described in the SF100 system. The SF200 consists of a logger with four mini Probes, each with single heat sensors. System provided with four metres of cable as standard.
Model SF100 \$2350	Model SF200 \$2600
Spare probe set \$385	Spare probe set \$650
Drilling jig \$80	Drilling jig \$80
Data reduction software (SAPCAL) F.O.C.	Data reduction software (SAPCAL) F.O.C.
Model SF300 System	Additional Information
Consists of similar sensor technology as the SF100 system but includes four probe sets each with a single heat sensor. Includes all features as described in the SF100. The SF300 consists of a logger with four probe sets each with a single heat sensor. System provided with 4 metres of cable as standard.	<i>Freight costs are included for destination within Australia.</i> <i>For cable requirements in excess of standard lengths, add \$4.50 per metre.</i>
Model SF300 \$2750	
Spare probe set \$750	
Drilling jig \$80	
Data reduction software (SAPCAL) F.O.C.
