

SKILLS ON MULTIPLE OCCUPANCIES IN THE NIMBIN VALLEY
from the DEET-funded Nimbin Skills Survey of 1992.

This printout is dated 01/02/94.

The database for this survey was designed by Antony McCardell (PhD), who is also the present writer, and a member of a multiple occupancy. The coordinator of the project was Graham Irvine, also a member of an MO. One of the four interviewers was an MO resident.

List of MO phone numbers which was matched with the survey is incomplete as at this printing, so there are probably more skills on MO's than are shown here.

- A double asterisk ** means that at least one interviewee living on an MO indicated that they had the skill. There may also have been other interviewees not from MO's who also possessed the skill.
- A single asterisk * means that the present writer (A. McCardell) knows at least one person personally on an MO, in the area surveyed, who had the skill at the time of the survey.

In the survey there was some unavoidable overlapping of skill definitions. The skill was identified as belonging to a 3-digit skill category with 5-digit subcategories roughly based on the list used by Richmond Valley LETS but with insights from a Government list (the ASCO list from memory). Graham Irvine created the list and decided on the categories into which the skills were placed.
