Canon

PC 920/PC 950 PERSONAL COPIERS

User friendly design and easy to use controls

Designed to compliment today's home-office or small business environment, the new PC920 and PC950 personal copiers incorporate sleek, modern design with easy to use, colour-coded controls. They not only look great but the compact dimensions take up just a minimum amount of space.

New Photo Mode

Photo mode, together with automatic and manual exposure controls delivers superior copies even from difficult originals such as photographs, newspapers and magazines.

New Toner Saver Mode

Canon also provides economy and value to customers. Toner Saver mode vastly improves cost performance without losing definition, common in so many draft modes.

Unsurpassed convenience

The PC 920/PC 950 incorporates Canon's exclusive RAPID Fusing System™ providing instant warm-up and eliminates waiting time. That's right... it's ready when you are. Auto shut-off is a built-in energy saving feature designed to automatically shut-off the copier after approximately five minutes of inactivity.

Light and compact with the performance of a large office copier

The PC 920/PC 950 is a small copier with advanced features. It will copy ten A4 pages per minute, 12 pages on the PC950, and has multiple paper feeding, using an easily-accessible 250-sheet front loading cassette and manual feeder. The enlargement/reduction and zoom functions incorporate preset ratios of 70%, 81%, 100%, 115% and 141%, and zoom capability in 1% increments between 70% to 141%. In addition, the PC920/PC950 can produce as many as 100 copies at a time.

For added flexibility, the PC 920/PC 950 copies on a variety of sizes and media, including labels, transparencies and business cards. Individual toner cartridges are available in red, green, blue, brown and traditional black. It's everything you need to deliver unrivalled copying productivity for your office.

Saves time and money

The PC 920/PC 950 offers time-saving, low maintenance operation with Canon's Single Cartridge System. The system contains virtually all the copier parts that can wear out including the drum, development unit and toner. This results in maximum copy quality at a low cost per copy. When the toner runs out, you simply replace the E31 cartridge that yields up to 4000 copies*.

For exceptional value for money, a Black Starter Cartridge, E16, is included in the box with each purchase, providing you with up to 2000 copies* at no extra charge.

And of course Canon's Support

These copiers come with an Australian 12-month warranty that is upgradeable to three years for a minimal cost and are also covered by Canon Customer Care Support Hotline.

* Based on 5% coverage on A4 paper

Specifications

Type	Personal Desktop
Platen	Stationary
Copying System	Indirect Electrostatic Transfer System

FAX-4750 PLAIN PAPER LASER FAX

Introducing a fax machine that's perfect for the business environment. Whether you're running a small business or work in a large corporation, this powerful workhorse is one that you can always rely on. With a large memory size and paper capacity, high speed transmission, and laser quality printing, this is a fax machine designed to keep on going, no matter what you throw at it. It can also become a 12 ppm laser printer by downloading a Windows driver from the Brother web site.

LASER FAX FEATURES

- 14.4kbps high speed fax modem
- Up to 6 seconds per page transmission speed¹
- Up to 30 page automatic document feeder
- 250 sheet paper capacity standard up to 500 sheets with optional paper tray²
- Dual access lets you scan a fax into memory while another is being received
- 64 shade grey scale for photographic transmission
- Super fine resolution and smoothing for sharper text definition
- Multiple resolution transmission saves time when sending pages of different resolutions
- 32 one-touch dial number
- 100 speed dial number
- Broadcasting up to 182 locations
- 4MB memory up to 210 pages¹ for sending
- 2MB memory up to 130 pages¹ for out-of paper reception (up-gradable to 4MB 260 pages¹ with optional ME-2050 memory or 6MB 390 pages¹ with optional ME-4050 memory)
- Error correction mode
- Automatic fax forwarding, remote retrieval
- Super quick scan - approximately 2 seconds per page¹ for memory transmission
- Automatic Fax / Tel switch
- Distinctive ringing (Telstra Duet) compatible³
- Caller ID and call waiting compatible³
- Delayed transmission with up to 50 timers which saves time and money
- User friendly on-screen programming
- Super coverpage™
- Polling (Standard/Sequential/Delayed/Security)
- ITU-T G3 with MH/MR/MMR coding

DIGITAL COPIER FEATURES

- Up to 12 cpm copy speed
- 600 dpi class copy output
- Multi-copying up to 99 copies with sorting
- Reduce or enlarge from 50% to 200% in 1% increments

TELEPHONE FEATURES

- Built-in telephone handset
- On-hook dial
- 132 automatic memory dials
- Electronic telephone index
- Automatic redial
- Answering machine interface

GENERAL FEATURES

- Weight 12kg
- Measurement 435 x 442 x 323 mm
- Power source 220 - 240V AC 50/60Hz
- Power consumption 3W or less in sleep mode, 60W or less in stand-by mode
- Noise level 39 dBA in stand-by mode
- Operation environment 10 to 32.5°C

Let **your** imagination soar at **1200 dpi**

Photo Quality - 1200 dpi

Featuring Lexmark's unique laser-crafted printheads, the Z12 delivers picture perfect colour images and laser sharp black text at 1200 x 1200 dpi - even on plain paper. Internet images are automatically optimised to ensure the best possible print quality from the web.

Lightning Fast Speed

When printing black text, the Z12 delivers up to 6 pages per minute. In colour, print speeds up to 3 pages per minute will allow you to spend more time being creative without the need to wait for the results.

The original A4 document was printed in 20 seconds

Higher Reliability & Precision

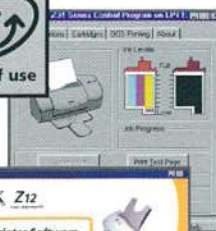

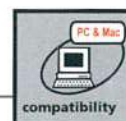

The Z12's Accu-Feed™ paper handling system provides higher reliability on a wider range of paper from envelopes to transparencies and everything in between.

The Lexmark Z12 Color Jetprinter™ is designed to meet the needs of budget-conscious home users who have an occasional printing requirement. The Z12 is perfect for users who may initially want to print high-quality letters, emails, school reports or internet pages, but also want the flexibility to print greeting cards and photos as they become more experienced and creative over time.

PC & Mac Compatibility

As technology advances, Lexmark have made sure that the Z12 has solutions for all users. Built in Parallel & USB connectivity is fitted as standard along with PC and Mac compatibility.

Easy to Install & Use

With just one click needed to install the Lexmark Z12, you can be sure that your system will be up and running in minutes. The interactive printer driver keeps you informed at every stage of the printing process and shows ink level and media status. Changing a cartridge is done in a snap: just open the cover and replace.

Product Information

Resolution:

- Up to 1200 x 1200 dots per inch in black and colour.

Print Speed:

- Up to 6 pages per minute for black text and up to 3 pages per minute for colour.

Cartridge Compatibility:

- High Resolution *Black* Ink Cartridge (17G0050 / 15M0850)
- High Resolution *Colour* Ink Cartridge (17G0060 / 15M0860)

Supported Media Types:

- Plain, Coated & Photographic Paper, 4 x 6 Snapshot Paper, A4, B5, Letter, Banner Paper Legal, Envelopes, Labels, Card stock, Iron-on Transfers, and Transparencies.

Ink Level Indicator:

- On-Screen display of colour, and black cartridge ink levels.

Compatibility:

- Windows®** 95, 98, 2000, Me & MS DOS (Pentium 200MHz or higher, 32MB RAM, 100MB Hard drive space recommended). USB connection for 98, 2000 and Me only.
- Mac OS 8.6** or higher (300MHz processor or higher, 64MB RAM, 12MB Free Hard drive space recommended).

LexExpress Warranty:

- 1 year LexExpress replacement warranty - if we can't solve the problem over the phone, we will send a replacement printer to your door within 24 hours.*

LexExpress

The fully featured, low priced printer that doesn't ask you to compromise.

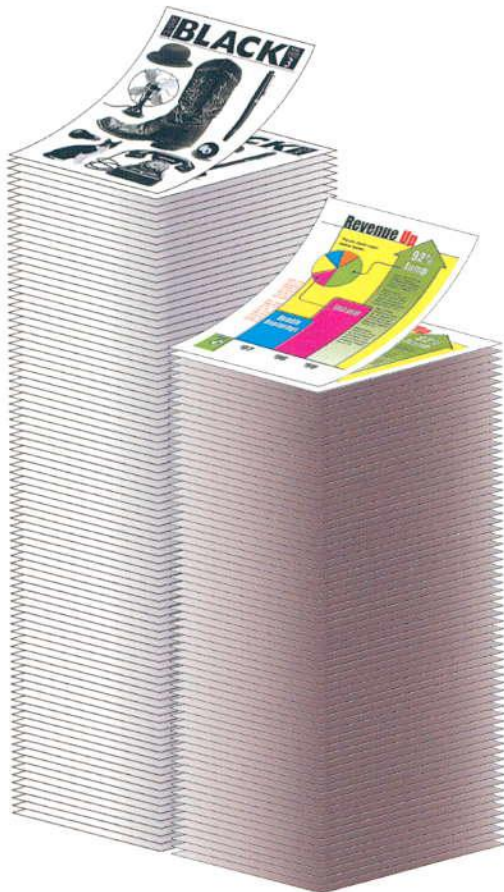

The BJC™-1000SP Colour Bubble Jet™ printer is the ideal printer for home and small office users who want to keep purchase price and operating costs down, while still obtaining quality.

Reduced operating costs.

Using a special resolution matrix, the BJC-1000SP features a Super Economy Mode that vastly improves operating economy without the definition sacrifices common to so many draft modes.

Super Economy, all colours. Compared to Standard and High Quality modes it effectively quadruples output from both the black and colour cartridges.

Exceptional output per cartridge. Using an optional, high-capacity BC-03 black ink cartridge, plus Super Economy Mode, you'll find that you can print up to 2400 pages in black & white. The BJC-1000SP also prints up to 400 colour pages from a single colour cartridge!

Super Economy, all colours. Print up to 2400 pages in black & white, or up to 400 colour pages!

Photo Mode colour, optimised for plain paper.

The standard colour inks included in the box offer Photo Mode printing and are optimised for plain paper to help keep operating costs low.

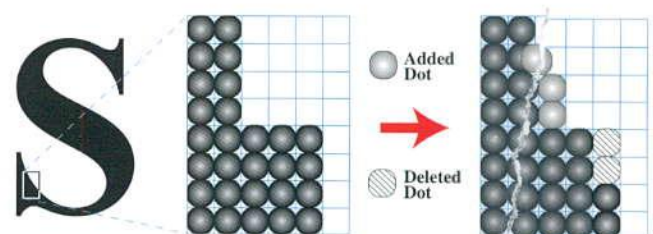

Advanced printer driver. The secret is the second generation of the Canon Colour Image Processing System (CCIPS Level 2) designed to produce better half-tones and stronger contrast.

Outstanding colour results. In addition, precision CMY colour placement creates a richer process black, with sharper definition and reduced colour bleed. The result is stronger colours, particularly in photographs.

Black & white that means business.

In seconds you can convert the BJC-1000SP from a colour printer to a dedicated black & white printer with the optional BC-03 black ink cartridge

High-speed blacks. It features high-speed text printing for professional looking documents and is optimised for plain paper. The 64-nozzle black cartridge can print up to 4 pages per minute?

Text smoothing provides resolution equivalent to 720 dpi in the horizontal direction of angled and curved text lines. When "jags" are detected, dots are added or deleted to reduce them.

easy-to-use printer

Canon

Business text and graphics. Rich vivid colours bring presentations to life.

Professional finish. The standard mode 360 dpi resolution compares favourably to personal lasers. To give important business correspondence an even higher degree of finish, the text smoothing function offers resolution up to 720 dpi to give text sharp, clear edges. Plus the BJC-1000SP offers up to 256 grey-scales for black & white images and graphics.

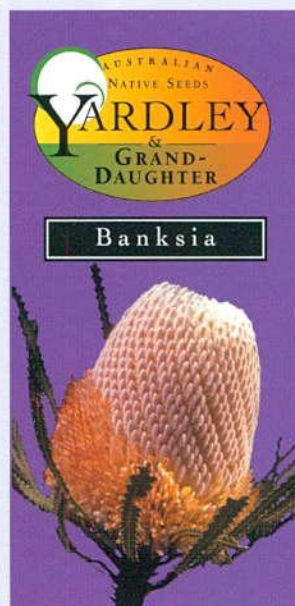

Gold standard photographic reproduction.

For extraordinary reproduction on higher paper grades the optional BC-06 PhotoRealism™ ink cartridge uses advanced inks to establish the gold standard in photographic reproduction.

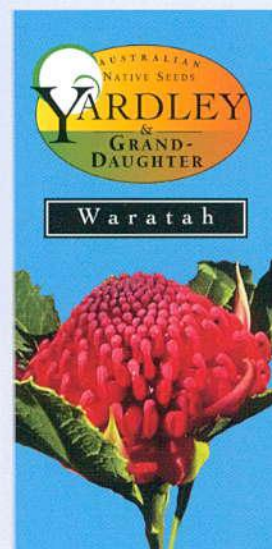

More colour levels per dot. Low density PhotoRealism inks can be printed in up to four saturation levels per dot. These are combined and layered to produce far more colour combinations per dot than comparable printers using conventional inks.

More accurate colours. The result is smoother colour gradations with reduced grain and superior half-tones. This improvement is especially noticeable in light shades such as off-whites and skin tones.

Four times the colour combinations.

Optional PhotoRealism smoothes colour gradations especially in areas of subtle tonal variation.

PhotoRealism inks print in multiple saturation levels per dot to produce up to four times the colour combinations.

Automatic image improvement, two ways.

The BJC-1000SP is specially designed to improve text and photographic images automatically without needing other specialist software.

Better Internet Images. Internet images are generally low resolution, typically 72 dpi, giving them a "pixelated" look with jagged text. To compensate for this, Canon developed Image Optimiser to smooth text and images, and can then print at the highest resolution supported by the printer.

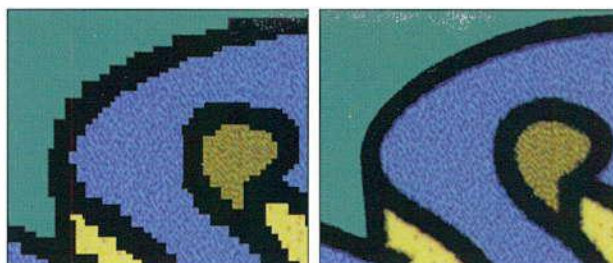

Image Optimiser smoothes images downloaded from the "Net".

CS8769

Before

The advanced image processing system takes into account characteristics of the human eye to ensure more natural looking colours.

After

Versatile and easy to use.

The BJC-1000SP includes a BC-05 colour ink cartridge in the box and offers optional choices of black ink, PhotoRealism ink and even a fluorescent ink cartridge for retail displays and signs.

Finally, drivers for Windows® 95/98/NT 4.0 are included in the box.

Before

After

Photo Optimiser colour balancing is available in several modes to correct defects in lighting, tones and exposure.

"Special Effects" enables you to simulate illustrations, sepia toning and more.

Before

After

Better photographic and digital images. The BJC-1000SP can also improve a whole range of photographic images, especially less than professional quality digital images. Photo Optimiser automatically adjusts for defects in exposure, highlights and shadows, without affecting the original file in the computer. It can even help you automatically create a variety of artistic effects converting photographs into "illustrations" and black & white photographs into sepia tones.

Canon Customer Care.

The BJC-1000SP features a one year warranty, which can be upgraded to three years and is backed by Canon's Customer Care hot-line support. Drivers are also available from the Canon website – www.canon.com.au

Banner printing and outstanding versatility. The BJC-1000SP can print banners up to 6 A4 pages long on special continuous-feed banner paper. It also prints on envelopes, transparencies, glossy photo paper, high gloss film and even T-shirt transfers. An optional fluorescent ink cartridge is available for displays and special projects.

Low purchase price, low operating cost and high performance.

High capacity, optional black ink cartridge.

Super Economy Mode for colour and black & white.

PhotoRealism for Living Colour.

Advanced driver enables rich black coverage.

Image Optimiser and Photo Optimiser for automatic image improvement.

Vibrant colour, optimised for plain paper.

BJC-1000SP
Super
Performance

- Outstanding operating economy. Low purchase price plus Super Economy Mode in black & white and colour.
- Everything you need. Vivid colours, even on plain paper, plus optional high speed black & white.
- Exceptional photographic quality. Photo Mode colour with standard inks optimised for plain paper, plus optional PhotoRealism to provide the gold standard in photographic reproduction.
- Automatic image improvement. Enhances the quality of all photographs, especially digital pictures, and Internet images.
- Banner printing and outstanding versatility. Print banners up to 6 A4 pages, envelopes, transparencies, glossy photo paper, high gloss film, and even T-shirt transfers.
